

CREATIVE INDUSTRIES - MEDIA ARTS

ACADEMIC

Grade 11/12
Curriculum Guide

CREATIVE INDUSTRIES - MEDIA ARTS

Prerequisite: None

Course Description:

This elective serves as a foundation for inquiry into Media Arts within the creative industries. It highlights diverse Media Art styles, forms, genres, and platforms across varied media, as well as techniques, principles, significant artists, works, and production processes, while providing opportunities for the applications of relevant media arts skills in local and global contexts. The course examines the creation, production, distribution, and exhibition of media works as part of the Philippine creative economy.

Elective: Academic

Time Allotment: 80 hours for one term

Content Standard:

- The learners demonstrate understanding of the creative industries' related laws and regulations, practices, applications, and ethical considerations in the local and global contexts of Media Arts, as well as of the elements, materials, techniques, and digital tools involved in media production processes.

Performance Standard:

- The learners apply media arts techniques and skills, as well as the proper use of digital tools, equipment, and platforms, in producing a creative media output, with reference to the mapped creative industries in their specific communities, as defined by relevant laws within local and global contexts.

LEARNING COMPETENCIES	CONTENT
<i>The learners...</i> 1. discuss the definitions and domains of the creative industries, with a focus on Media Arts, and their impact on society and daily life;	I. Overview of Philippine Creative Industries A. Brief Background of Creative Industries B. Domains of the Creative Industry 1. Definition of Media Arts within the creative industries 2. Locating the different media arts disciplines within the creative industries domains, such as: • Audiovisual media - film, television, animation, etc. • Digital interactive media - web design, video games, AR/VR content, etc. • Creative services - advertising, media consultancy, photo-video coverage services, etc. • Design - graphic design, production design, logo and visual design, etc. • Publishing and Print - text articles, illustration, print layout, graphic design, etc. • Performing arts - dance films, video art, experimental performance media, etc. • Visual arts - photography, animation, mixed-media and video art, etc. C. Challenges and opportunities facing the Philippine media arts industries 1. Globalization and market competition 2. Funding and audience sustainability 3. Digital platforms and global audiences 4. Innovation and technology

LEARNING COMPETENCIES	CONTENT
2. infer the relevance and implications of prevailing creative industry laws for media production;	II. Laws Related to Creative Industries and Media Arts A. Philippine Creative Industries Act (Republic Act No. 11904) B. Intellectual Property Rights (Republic Act No. 8293) 1. Core Intellectual Property Concepts • Trademarks, Patents, and Copyright in audiovisual and digital works • Moral, Economic, and other Related Rights • Licensing and distribution rights C. Real-World Intellectual Property Concerns in Media Arts 1. Copyright infringement and digital piracy 2. Fair Use and Creative Commons 3. Plagiarism, Infringement, and IP Theft 4. Generative AI and Intellectual Property Ownership <i>Note: Discussion cases on creative works in relation to intellectual property concepts and issues (see sample/suggested cases for class discussion below).</i>
3. conduct industry mapping for the media arts sector to represent the roles, relationships, and interdependencies of key players within the industry; and	III. Industry Mapping in Media Arts A. Introduction to Industry Mapping 1. Definition and purpose of industry mapping 2. Applications in media production and creative careers (e.g. job hunting, business planning, policy development) B. Key players in the media arts industry (e.g., director, producer, editor, cinematographer,

LEARNING COMPETENCIES	CONTENT
	animator, graphic designer, content creator, distributor, platform provider, critic) C. Mapping the value chain in media production and distribution D. Roles, responsibilities, and corresponding rights of media practitioners
4. apply media arts techniques in producing a creative work with consideration of ethical, safety, and industry practices.	IV. Elements and Principles of Media Arts Artistic Expression A. Forms of media arts 1. Photography 2. Film and video 3. Animation 4. Graphic and digital design 5. Interactive and multimedia production B. Elements of media composition (e.g., framing, color, sound, editing, sequencing, narrative structure, visual hierarchy, typography, visual communication) C. Media production process 1. Concept and project development 2. Preproduction and planning 3. Production and postproduction 4. Publishing and distribution D. Exploration of platforms and venues for media exhibition (print, broadcast, digital, social media) E. Ethical use and proper attribution of digital content and generative artificial intelligence (AI) tools

LEARNING COMPETENCIES	CONTENT
	V. Safety Protocols and Procedures in Media Arts A. Physical factors in the working environment B. Safety training (tools and equipment) C. Risk assessment and management D. Workspace safety and hazard control E. Prevention and precautions in various disciplines F. Proper care and use of materials and equipment G. Taking care of the body

GLOSSARY

<i>Artistic Expression</i>	the process of conveying ideas, emotions, and experiences through various forms of art, including painting, literature, music, and performance. It serves as a reflection of cultural values and societal issues, allowing artists to communicate their unique perspectives and connect with audiences on a deeper level. In Media Arts, artistic expression is conveyed through the creative use of media technologies, materials, and processes.
<i>Creative Commons</i>	A system of free, standardized licenses that allow creators to grant the public permission to use, share, and sometimes modify their work under specified conditions, such as attribution or non-commercial use.
<i>Creative Industry</i>	the trades involving persons, whether natural or juridical, that produce cultural, artistic, and innovative goods and services originating from human creativity, skill, and talent and having the potential to create wealth and livelihood through the generation and utilization of intellectual property. Creative industries include those directly or indirectly involved in the creation, production, and manufacturing, performance, broadcasting, communication and exhibition, or distribution and sale of works and other subject matter, in accordance with existing laws, rules, and regulations on intellectual property rights protection (Republic Act No. 11904).

<i>Creative work</i>	an original product of human imagination, creativity, and skill, typically in art, literature, music, or design, or media arts, that express unique ideas and is protected by intellectual property laws, such as copyright.
<i>Fair Use</i>	A legal doctrine that allows limited use of copyrighted material without permission from the copyright owner for purposes such as education, criticism, commentary, news reporting, teaching, scholarship, or research.
<i>Generative artificial intelligence (AI)</i>	refers to computer systems that can create original content such as text, images, music, or designs based on data training. Issues of intellectual property ownership arise when determining who owns the rights to AI-generated outputs—whether it is the user, the developer, or no one—especially when such outputs are derived from existing copyrighted materials.
<i>Intellectual property (IP)</i>	creations of the mind, such as inventions, literary and artistic works, designs, and symbols, names, and images used in commerce. It provides legal protection to creators and owners of these works.
<i>Industry Mapping</i>	a systematic process of identifying and analyzing the key stakeholders, roles, relationships, networks, and structures within an industry to understand how its various sectors and participants interact and contribute to its development.
<i>Media Arts</i>	the creative discipline that integrates artistic expression with contemporary media technologies (such as film, video, internet, print, etc.) to produce, analyze, and distribute works across various domains of the creative industries.
<i>Patents</i>	legal protections granted to inventors for new inventions or innovations, giving them exclusive rights to make, use, sell, or distribute their invention for a specified period, typically 20 years. Patents prevent others from using the invention without permission, thereby encouraging innovation by protecting intellectual property rights.
<i>Plagiarism</i>	the act of using another person's ideas, words, or creative work without proper acknowledgment or citation, presenting them as one's own original work.

APPENDIX

Suggested Case Studies for IP Discussions

Dali Copyright Infringement Issue (2024)

Convenience Store DALI was recently accused of copyright infringement through their sale of products that closely resemble other, more established consumer brands. The controversy touches on the blurred lines between inspiration and exploitation in consumer markets, raising questions about intellectual property and originality in commerce.

Wolfgang Vinyl Reissue Issue vs Ivory Records (2024)

In 2024, Ivory Records announced a vinyl reissue of iconic rock band Wolfgang's music. Backlash arose when Wolfgang announced it would not be supporting the release because of unfair royalties and other concerns. This controversy highlights broader concerns in the local music industry about artist rights, copyright control, and the ethics of reissuing legacy content without full consent from original creators.

Hapag and La Paz Batchoy (2024)

The discussion around "Hapag" and La Paz Batchoy emerged after the release of a contemporary artwork or exhibit titled *Hapag*, which was perceived by some to recontextualize or stylize the traditional Filipino dish La Paz Batchoy in a way that seemed disconnected from its culinary and cultural roots. The issue brings to light the challenges present between artistic reinterpretation and cultural authenticity, especially when everyday symbols of heritage are reimagined in art spaces, raising valuable questions about representation, respect, and accessibility in the arts.
