

SOCIAL SCIENCES (THEORY AND PRACTICE)

ACADEMIC

Grade 11/12

Curriculum Guide

SOCIAL SCIENCES (THEORY AND PRACTICE)

Prerequisite: None

Course Description:

The course introduces learners to basic concepts, approaches, and methods in the disciplines that comprise the Social Sciences and Applied Social Sciences. It highlights the intersections among these disciplines and their roles in addressing social development concerns.

Elective: Academic

Time Allotment: 80 hours for one term

Content Standards:

- The learners demonstrate an understanding of the historical development, key concepts, and approaches in the Social Sciences, including its major theories, enabling them to analyze and explain human behavior, social structures, and cultural dynamics within diverse societal contexts.
- The learners demonstrate an understanding of the behavioral and applied social sciences, recognizing the roles of professionals, while grasping the functions and impacts of these disciplines in promoting social change and community well-being.

Performance Standards:

- The learners apply social science disciplines in explaining a social issue using a multimedia presentation, infographic, podcast, or other relevant presentation formats.
- The learners consult with a professional from an applied social science discipline (e.g., counseling, social work, criminology, education, communication) to gain insights into their roles and contributions to social change, analyze the discipline's real-world impact, and synthesize their findings into a reflective report or presentation, demonstrating effective communication and ethical awareness.

Learning Competencies	Content
THE SIGNIFICANCE AND THE FOUNDATIONS OF THE SOCIAL SCIENCES 1. Differentiate the nature and functions of the social science disciplines from those of the natural sciences and the humanities 2. Establish the interconnections among the social science disciplines, natural sciences, and humanities 3. Examine the historical foundations and social contexts that led to the development of the social sciences 4. Examine various social science disciplines in terms of their fields, main areas of inquiry, methods, theories, and approaches 5. Analyze key theories, methods, and career opportunities in history	Social Sciences as the Study of Society Historical Contexts of the Emergence of the Social Sciences The Social Science Disciplines: History/Kasaysayan
POWER, GOVERNANCE, AND ECONOMIC SYSTEMS 6. Analyze political science in understanding power, governance, and political behavior, major political theories, and key methods of political inquiry 7. Explain diverse career opportunities in government, law, international relations, research, media, advocacy, and security 8. Evaluate economics as a social science discipline, including its theories and methods and career opportunities, influenced by globalization	The Social Science Disciplines: Political Science The Social Science Disciplines: Economics

Learning Competencies	Content
SOCIETY, CULTURE, AND COMMUNITY PATTERNS 9. Analyze key theories and methods and careers in sociology and anthropology 10. Compare sociology and anthropology in terms of theories, methods and career opportunities in understanding societies and culture	The Social Science Disciplines: Sociology, Anthropology
SPACE, LANGUAGE, AND TRANSDISCIPLINARY SYSTEMS THINKING 11. Analyze key theories, methods, and career opportunities in geography 12. Analyze key theories, methods, and career opportunities in linguistics 13. Examine the value of transdisciplinarity in understanding society	The Social Science Disciplines: Geography and Linguistics Transdisciplinarity: Integration and Collaboration Within, Across, and Beyond Disciplines
BEHAVIORAL AND THE APPLIED SOCIAL SCIENCES: COUNSELING 14. Analyze the key theories and methods and career pathways in counseling	Counseling as an Applied Social Science: Concepts, Theories, Methods, and Career Pathways 1. Defining Counseling as an Applied Social Science 2. Major Counseling Theories and Filipino Indigenous Concepts 3. Key Counseling Methods and Techniques 4. Influence of Filipino Cultural Values on Counseling Practices 5. Career Pathways in Counseling

Learning Competencies	Content
BEHAVIORAL AND THE APPLIED SOCIAL SCIENCES: SOCIAL WORK AND EDUCATION 15.Examine social work as an applied social science, including its key theories and approaches, and methods and career opportunities 16.Analyze the goals, key educational theories and philosophies, and methods of educational research in the Philippines	The Focus of Social Work: Theories, Methods, and Career Pathways 1. Understanding Social Work as an Applied Social Science 2. Focus of Study in Social Work 3. Theories and Approaches Guiding Social Work Practice 4. Methods of Social Work Practice 5. Career Opportunities in Social Work The Role of Education: Theories, Methods, and Career Pathways 1. Defining Education and its Goals 2. Key Educational Theories and Philosophies 3. Methods of Educational Research 4. Teaching by Key Stage in the Philippines 5. The Relationship Between Education and Society 6. Career Pathways in Education
BEHAVIORAL AND THE APPLIED SOCIAL SCIENCES: COMMUNICATION AND MULTIMEDIA 17.Analyze communication and multimedia arts as an applied social science, including its major theories, and career pathways	Communication and Multimedia Studies as Applied Social Sciences 1. Key Functions of Communication and Multimedia 2. Major Communication and Multimedia Theories 3. Effective Communication and Multimedia Skills 4. Career Pathways in Communication and Multimedia Studies

Learning Competencies	Content
BEHAVIORAL AND THE APPLIED SOCIAL SCIENCES: CRIMINOLOGY 18.Examine criminology as an applied social science, including its theories, methods and career pathways	Criminology: The Study of Crime, Justice, and Social Impact 1. Defining Criminology as an Applied Social Science 2. Key Focus Areas of Criminology 3. Major Criminological Theories 4. Methods of Criminological Research 5. Career Pathways in Criminology
BEHAVIORAL AND THE APPLIED SOCIAL SCIENCES: GENDER STUDIES AND DEVELOPMENT AND TRANSDISCIPLINARITY 19.Examine gender studies and development, including its theories and concepts, methods of inquiry, interdisciplinary nature, and career pathways 20.Examine the value of transdisciplinarity in understanding society	Gender Studies and Development as Interdisciplinary Social Sciences 1. What is Gender Studies and Development? 2. Key Theories and Concepts in Gender Studies and Development 3. Methods of Inquiry in Gender Studies and Development 4. The Interdisciplinary Nature of Gender Studies and Development 5. Career Opportunities in Gender Studies and Development The Interdisciplinary Lens: Viewing Society Through Multiple Social Science Fields
