

BUSINESS 3 (BUSINESS ECONOMICS)

ACADEMIC

Grade 12

Curriculum Guide

BUSINESS 3
(BUSINESS ECONOMICS)

***Prerequisites: Business 1 (Basic Accounting), Business 2 (Business Finance and Income Taxation),
and Introduction to Organization and Management***

Course Description

This course explores fundamental concepts, principles, and practices in business economics focusing on its practical application in real-world business environments. It emphasizes the application of informed decision-making in addressing current economic issues, trends, and contemporary business challenges.

Elective: Academic

Time Allotment: 80 hours for one term

Content Standard

- The learners demonstrate an understanding of the key concepts, principles, and practices in business economics, and apply this knowledge to formulate strategies and make well-informed decisions within the business environment.
- The learners demonstrate an understanding of the socio-economic concerns in the business macroenvironment and their interaction with the attainment of a sustainable economy.

Performance Standard

- Learners propose an appropriate business economics strategy or intervention in addressing a particular economic challenge within a local business setting.
- Learners develop an innovative and sustainable business solution that addresses a socioeconomic challenge in the community.
