

GARMENTS ARTISANRY

TECHNICAL-PROFESSIONAL

Grade 12

**Three-Term Budget Of Work (BOW)
for Learning Competencies**

TECHNICAL-PROFESSIONAL ARTISANRY AND CREATIVE ENTERPRISE Grade 12

Three-Term Budget Of Work For Learning Competencies

Please note that each Tech-Pro elective is completed within one term if delivered at Grade 12.

Term Plan	
Elective	Garments Artisanry
Performance Standard	The learners create sustainable upper garments following occupational health and safety precautions. The learners create sustainable lower garments following Occupational Health and Safety precautions. The learners create blazers and trousers following Occupational Health and Safety precautions. The learners create sustainable sleeping garments and children's wear following Occupational Health and Safety precautions.
Content Standard	• The learners demonstrate essential knowledge and skills in designing, sewing and assembling upper garments. • The learners demonstrate essential knowledge and skills in designing, sewing, and assembling lower garments. • The learners demonstrate essential knowledge and skills in designing, sewing, and assembling blazers and trousers. • The learners demonstrate essential knowledge and skills in designing, sewing, and assembling sleeping garments.

Week	Learning Competency	Suggested Activities
1	- Discuss the key components of dressmaking, tailoring, and fashion design following Occupational Health and Safety precautions - Discuss the considerations in designing garments.	Dressmaking Components Concept Map - Create a concept map showing the key components of dressmaking, tailoring, and fashion design, highlighting safety precautions. Safety Reflection - Write a reflection explaining why following Occupational Health and Safety standards is important in dressmaking and tailoring. Design Considerations Chart - Create a chart listing key factors to consider when designing garments (fabric, fit, style, ergonomics, season). Design Reflection - Write a short reflection on how these considerations affect the functionality and aesthetics of a garment.
2	- Create own designs of ladies' blouse and men's polo. - Perform pattern drafting for created designs following Occupational Health and Safety precautions.	Blouse & Polo Sketch - Draw your own design for a ladies' blouse and a men's polo including color, style, and detailed features. Design Explanation - Write a brief explanation of your design choices, including intended audience, fabric, and functionality. Pattern Drafting Practice

Week	Learning Competency	Suggested Activities
		○ Draft patterns for your blouse and polo designs following correct measurements and safe use of tools ● Drafting Reflection ○ Write a reflection explaining the challenges you faced and how you applied safety precautions.
3	● Perform sewing and assembling of sustainable upper garments. ● Apply post-garment construction procedures.	● Sewing Practice ○ Sew your blouse and polo designs using sustainable practices and proper safety measures. ● Sewing Process Report ○ Write a short report documenting the steps you followed while sewing, including challenges and solutions. ● Finishing Steps Documentation ○ Document all post-construction procedures applied to your upper garments, including pressing, hemming, and labeling. ● Quality Check Simulation ○ Inspect your finished garments and list improvements or corrections needed for professional standards.
4	● Discuss marketing strategy ● Discuss the types and parts of lower garments	● Marketing Plan Outline ○ Write a one-page plan outlining how

Week	Learning Competency	Suggested Activities
		you would market your garment products to your target customers. • Marketing Presentation ◦ Create a short visual presentation showing your marketing strategy and promotional ideas. • Lower Garments Chart ◦ Create a chart showing types of lower garments (skirts, shorts, pants) and their key parts. • Design Explanation ◦ Write a brief description explaining your design choices and target market.
5	• Create own designs of skirts and shorts based on standards • Perform pattern drafting for created designs	• Skirt & Shorts Sketch ◦ Draw your own skirt and shorts designs including measurements, fabrics, and style details. • Parts Diagram ◦ Draw a labeled diagram identifying the parts of skirts, shorts, and pants. • Pattern Drafting Practice ◦ Draft patterns for your skirt and shorts designs following correct measurements and safety precautions. • Drafting Reflection ◦ Write a reflection on the challenges faced while drafting and how you

Week	Learning Competency	Suggested Activities
		solved them.
6	- Perform sewing and assembling and creating sustainable designs for lower garments - Apply post-garment construction procedures	Sewing Practice - Sew your skirt and shorts designs following sustainable and safe techniques. Post-Sewing Report - Document the steps taken during sewing and assembling, including finishing processes. Finishing Documentation - Write a report detailing all post-construction steps applied to your lower garments. Quality Inspection Checklist - Perform an inspection of your finished garments and make a checklist of improvements.
7	- Discuss the types and parts of blazers and trousers - Create own designs of blazers and trousers	Blazer & Trouser Parts Diagram - Create a labeled diagram showing the parts of blazers and trousers. Parts Comparison Table - Compare the parts of blazers vs. trousers and explain their function. Blazer & Trouser Design Sketch - Draw your own blazer and trousers designs including fabrics, colors, and

Week	Learning Competency	Suggested Activities
		style details. • Design Explanation ◦ Write a brief explanation of your design choices and intended customer
8	• Perform pattern drafting for created designs • Perform sewing and assembling sustainable blazers and trousers	• Pattern Drafting Practice ◦ Draft patterns for your blazer and trousers designs with correct measurements. • Drafting Reflection ◦ Reflect on the drafting process and describe challenges and solutions. • Sewing Practice ◦ Assemble and sew your blazer and trousers using safe and sustainable methods. • Sewing Process Report ◦ Write a short report documenting the steps and techniques used during sewing.
9	• Apply post-garment construction procedures	• Finishing Report ◦ Document the post-construction procedures applied to your blazer and trousers (pressing, trimming, labeling). • Quality Inspection ◦ Inspect finished garments and note

Week	Learning Competency	Suggested Activities
		improvements needed for professional quality.
10	Garments Artisanry - Discuss the types and parts of sleeping garments and children's wear - Create own designs of sleeping garment and children's wear	Garments Diagram - Create a labeled diagram showing parts of sleeping garments and children's wear. Comparison Table - Compare sleeping garments and children's wear and explain differences in design and function Sleeping & Children's Wear Sketch - Draw your own sleeping garment and children's wear designs with measurements and style details. Design Explanation - Write a brief description of your design choices and intended users.
11	- Perform pattern drafting for sleeping garments and children's wear - Perform sewing and assembling of sustainable sleeping garments and children's wear - Apply post-garment construction procedures.	Pattern Drafting Practice - Draft patterns for your sleeping garments and children's wear following safe and proper measurement techniques Drafting Reflection - Write a reflection describing any challenges and how you solved them while drafting.

Week	Learning Competency	Suggested Activities
		• Sewing Practice ◦ Sew your sleeping garments and children's wear using safe and sustainable methods. • Post-Sewing Documentation ◦ Document the sewing and assembling steps including finishing techniques. • Finishing Documentation ◦ Prepare a report detailing all post-construction procedures for sleeping garments and children's wear. • Quality Inspection Checklist ◦ Inspect your finished garments and create a checklist of improvements for professional quality.
Suggested Performance Tasks	• Individual Performance Task: Upper Garment Design & Construction ◦ Design and sew a sustainable blouse or polo individually, applying proper Occupational Health and Safety precautions. • Group Task: Upper Garment Showcase ◦ In groups, create and display 2–3 sustainable upper garments, highlighting safe practices, sustainable materials, and finishing techniques. • Individual Performance Task: Skirt/Shorts Sewing Practice ◦ Individually design and sew a skirt or pair of shorts using sustainable fabrics while following safety precautions. • Group Task: Lower Garment Mini-Collection ◦ Collaboratively design and produce a mini-collection of 2–3 lower garments (skirts, shorts, pants), applying Occupational Health and Safety standards.	

Week	Learning Competency	Suggested Activities
	• Individual Performance Task: Blazer & Trouser Project ◦ Draft, sew, and finish a blazer or trousers individually, following sustainable practices and safety guidelines. • Group Task: Blazer & Trouser Ensemble Display ◦ In groups, create a coordinated blazer and trousers ensemble (2–3 pieces), demonstrating safe and sustainable construction techniques. • Individual Performance Task: Sleeping Garment/Children's Wear Sewing ◦ Individually design and sew a sleeping garment or children's wear item using sustainable materials and proper safety precautions. • Group Task: Children's Wear Mini-Collection ◦ In groups, produce a small collection of sleeping garments or children's wear (2–3 pieces) demonstrating sustainable design and safe sewing practices
