

HANDICRAFTS: WEAVING

TECHNICAL-PROFESSIONAL

Grade 12

**Three-Term Budget Of Work (BOW)
for Learning Competencies**

TECHNICAL-PROFESSIONAL ARTISANRY AND CREATIVE ENTERPRISE Grade 12

Three-Term Budget Of Work For Learning Competencies

Please note that each Tech-Pro elective is completed within one term if delivered at Grade 12.

Term Plan	
Elective	Handicrafts: Weaving
Performance Standard	The learners craft basketry products. The learners apply the techniques in weaving in creating innovative mat products. The learners apply the procedures in making handloom device for textile weaving. The learners apply the steps in handloom weaving to create sustainable woven textile products.
Content Standard	• The learners exhibit knowledge in basketry. • The learners demonstrate understanding of the techniques, pattern, and steps in mat weaving. • The learners demonstrate understanding the procedures of handloom weaving in making handloom device. • The learners demonstrate an understanding on handloom weaving procedure.

Week	Learning Competency	Suggested Activities
1	- Discuss the principles of basketry. - Discuss tools and raw materials used for basketry weaving. - Perform the steps in preparing raw materials for weaving.	Basketry Principles Concept Map - Create a concept map illustrating the principles of basketry, including weaving techniques and design elements. Reflection on Basketry Principles - Write a short reflection explaining how the principles of basketry guide the creation of functional and decorative products. Tools & Materials Identification - List and describe common basketry tools and raw materials, including their functions. Materials Comparison Chart - Create a chart comparing different raw materials used in basketry (durability, flexibility, sustainability). Raw Material Preparation Practice - Individually practice preparing raw materials (soaking, splitting, smoothing) for basket weaving. Preparation Demonstration - In groups, demonstrate the full preparation process of raw materials for a basket project.
2	Create basket products following the	Individual Basket Weaving

Week	Learning Competency	Suggested Activities
	Occupational Safety and Health standards. • Apply techniques in finishing basket products.	◦ Create a simple basket following safety guidelines and proper weaving techniques. • Group Basket Project ◦ In groups, create a medium-sized basket product applying Occupational Safety and Health standards. • Individual Finishing Practice ◦ Apply finishing techniques such as trimming, smoothing, and polishing to your basket product. • Group Finishing Demonstration ◦ Collaboratively finish a larger basket project, demonstrating professional finishing methods.
3	• Discuss the methods, techniques, and patterns in mat weaving • Create mat products using the steps in weaving with safety precautions	• Mat Weaving Methods Chart ◦ Create a chart showing different mat weaving techniques, methods, and patterns. • Pattern Design Exercise ◦ Design a unique mat weaving pattern applying learned techniques and safety considerations. • Individual Mat Weaving ◦ Create a small mat following proper steps and Occupational Safety and Health precautions

Week	Learning Competency	Suggested Activities
		• Group Mat Weaving Project ◦ Collaboratively weave a larger mat in groups, applying safe handling of tools and materials.
4 to 5	• Create innovative and sustainable basketry products using weaving techniques • Determine the production cost for basketry products • Engage in marketing of basketry products.	• Innovative Basket Design ◦ Design and create a basket using sustainable materials and innovative weaving techniques. • Group Creative Project ◦ In groups, design and produce a unique basket product that is functional, sustainable, and decorative. • Cost Calculation Exercise ◦ Individually calculate the cost of materials, labor, and overhead for a basketry product. • Group Costing Activity ◦ In groups, determine the production cost for a basketry collection and suggest appropriate pricing • Marketing Plan Development ◦ Individually prepare a marketing plan for your basket product, including target market, pricing, and promotion. • Product Promotion Simulation ◦ In groups, simulate selling and

Week	Learning Competency	Suggested Activities
		promoting your basket products using posters, flyers, or digital platforms.
6 to 7	- Discuss the principles of handloom weaving. - Determine the usage and maintenance of tools, materials, and devices for handloom weaving. - Apply the steps in making handloom devices for textile weaving.	Handloom Principles Concept Map - Create a concept map showing the principles and importance of handloom weaving. Reflection on Handloom Weaving - Write a short reflection on how the principles of handloom weaving influence textile creation. Tool & Device Guide - Prepare a guide showing proper usage and maintenance of handloom tools and devices. Group Maintenance Demonstration - Demonstrate the proper setup, usage, and maintenance of handloom tools in groups Device Construction Practice - Individually construct a basic handloom device following step-by-step procedures. Group Device Assembly - Collaboratively assemble a handloom device in groups, applying safety and accuracy standards.

Week	Learning Competency	Suggested Activities
8	- Explain processes in handloom weaving. - Create mat products using the steps in weaving with safety precautions.	Handloom Process Flowchart - Create a flowchart showing the complete handloom weaving process from preparation to finishing. Process Presentation - In groups, present the steps of handloom weaving, explaining techniques and common challenges.
9 to 11	- Weave textile using handloom devices - Plan post weaving activities of woven textile products	Individual Weaving Practice - Create a small textile sample using a handloom device individually, applying proper technique. Group Weaving Project - In groups, weave a larger textile piece, coordinating roles and demonstrating safety and precision. Individual Post-Weaving Report - Write a report detailing post-weaving activities such as finishing, trimming, and storage. Group Post-Weaving Simulation - In groups, simulate post-weaving activities on completed textiles, including labeling, quality checking, and preparation for sale

Week	Learning Competency	Suggested Activities
Suggested Performance Tasks	• Individual Performance Task: Basket Weaving Practice ◦ Individually create a small basket product using prepared raw materials, following Occupational Health and Safety standards. • Group Task: Collaborative Basket Project ◦ In groups, design and produce a medium-sized basket product, applying proper weaving techniques and safety precautions. • Individual Performance Task: Mat Weaving Sample ◦ Create a small mat individually, applying at least one weaving pattern or technique learned. • Group Task: Innovative Mat Design ◦ In groups, produce a larger mat incorporating multiple weaving techniques, patterns, and sustainable design elements. • Individual Performance Task: Handloom Device Construction ◦ Individually construct a basic handloom device following step-by-step procedures and safety measures. • Group Task: Handloom Device Assembly ◦ In groups, assemble a functional handloom device to be used for collaborative weaving, demonstrating correct usage and maintenance. • Individual Performance Task: Textile Weaving Sample ◦ Weave a small textile piece individually using a handloom device, applying proper weaving techniques and sustainable materials. • Group Task: Woven Textile Project ◦ In groups, collaboratively produce a larger woven textile product, incorporating sustainability, proper technique, and finishing/post-weaving activities
